APPENDIX

1. Approved Recipe

CULINARY INNOVATION AND NEW PRODUCT DEVELOPMENT

APPROVAL RECIPE

Recipe Name	:	PROTEIN COOKIES
TITLE OF C&D	:	Combining soybean and whey protein as a ingredients for cookies
Yield	:	15-20 portion
Main Ingredients	:	100 G SOYBEAN
Ingredients	:	

- 105 g canola oil	- 2,5 g vanilla extract
- 100 g soybean	- 2,5 g baking soda
- 90 g oat flour	- 0,5 g salt
- 65 g organic palm sugar	- 50 g omega 3 egg
- 40 g whey protein	- 100 g raisin

Method :

Soybean flour :

- Make soybean flour by roasting soybeans then blend and filter until smooth, then set aside.

Oat flour :

- Make oat flour from rolled oats which are blended then strained.

Cookies :

1. Combine canola oil, organic palm sugar, and salt in a bowl. Beat with a mixer on high speed for 1-2 minutes.
2. Add the egg and vanilla extract. Beat on high speed.
3. Add the sifted oat flour, soybean flour, baking soda, and whey protein. Beat just until the dough is mixed well. Add raisins.
4. Prepare a baking tray lined with baking paper. Flat the dough to 5mm. Shape the dough using a ring cutter.
5. Bake at 165°C for 15-20 minutes.

CULINARY INNOVATION AND NEW PRODUCT DEVELOPMENT

Product Description

This high-protein, high-caloric cookie is specifically designed for folks with elevated energy needs including athletes and people who need satiating, convenient snacks. Different from conventional biscuits that usually have high amount of edible sugar and low content of protein, this cookie provides protein as well calories that help muscles to recover and energy levels. It contains soy beans as its main component, it provides the body with high protein content necessary for muscle growth and repair. Its energy-dense character, which is built on using canola oil, and healthy fats, satisfies the needs of people who require a high-calorie input. Its nutritional make-up containing balanced amounts of protein, carbs and fats allows for consistent supply of energy and satiety which this cookie is a perfect option for those who prefer quick, individualized snacks that can be adjusted to meet various dietary needs.

TRIAL PROGRESS

In the first stage I didn't add enough sugar which resulting the cookie was not quite as sweet as it had to be. Also, the cookies were kind of burned because I baked them at the wrong heat (180 degrees Celsius for 15 minutes). Contrary to that, sugar was increased during the second attempt and the baking time was 15-20 minutes at 165 degrees Celsius. I wondered whether I did a good job with cookies I baked. The final result tasted great and was baked perfectly.

NOTES :

1. Ok
2. Sudah baik
3. Ada serat yg tertinggal setelah dikunyah, tekstur cookies kurang chruncey
4. Good
5. Cookies sudah oke
6. Enak, lembut, manisnya pas, tidak terlalu kering
7. A bit grainy, too much brown sugar flavor
8. Bisa lebih di renyahkan lagi untuk texture
9. Nice
10. all good
