APPENDIX

1. Approved Recipe

CULINARY INNOVATION AND NEW PRODUCT DEVELOPMENT

APPROVAL RECIPE

Recipe Name : Fruit Leather Made From Mangosteen Rind and Dates
TITLE OF C&D : The Utilization of Mangosteen Rind and Dates for Fruit Leather
Yield : 2 – 3 Portion
Main Ingredients : 50 g Mangosteen Rind & 100 g Dates
Ingredients :

- 50 g Mangosteen Rind
- 100 g Dates
- 30 g Sugar
- 400 ml Water
- 3 g Salt
- 10 ml Lemon Juice

Method :

1. For Mangosteen rind, rub the rinds with salt and let it sit for about 30 minutes
2. After that, rinse the mangosteen rind thoroughly
3. Boil the mangosteen rind in water at 90 C that has been added with sugar over low heat for approximately 30 minutes
4. After that, separate the flesh and skin parts from the mangosteen skin; the part to be used is the flesh of the mangosteen skin
5. For the dates, microwave the dates in water for 2 minutes so that it gets softened
6. Blend the mangosteen rinds and dates using the water from boiling the mangosteen skin and dates until smooth.
7. Simmer and stir the puree in the pan and season it with lemon juice, until the puree has thickened
8. Line trays with parchment paper, spread onto dehydrated trays, dry at 60 C for 6-8 hours
9. When the fruit leather is ready, peel it up from the parchment paper and roll it with parchment paper

CULINARY INNOVATION AND NEW PRODUCT DEVELOPMENT

Product Description

Fruit leather is a dried fruit product in thin sheets with unique consistency, made from various fruits either using one fruit or mixed with other, known for its long shelf life. For this fruit leather, the ingredient used are mangosteen rind and dates. The purpose is to create a delicious and nutritous snack from natural ingredient while also reducing food waste by using the mangosteen rind.

TRIAL PROGRESS (50 – 100 WORDS)

In the first trial, using a ratio of 2:1 between mangosteen skin and dates and boiling the mangosteen skin without sugar resulted in a strong bitter taste. However, in the second trial, with a ratio of 1:2 and the treatment of salt on the mangosteen skin and boiling it with sugar water, the bitterness was significantly reduced. The final result is a product with a milder bitter taste, better flavor, and only leaving a slight bitterness in the aftertaste.

NOTES :

1. Nicely done, apalila memungkinkan pertebal sedikit fruit roll nya
2. all good
3. Good job
4. Enak, tampilan mulus juga
5. –
6. Kalau bisa texture nya lebih chewy kayak permen
7. If a bit thicker would taste nicer
8. oke, kurang chewy sedikit
9. –
10. –
