

CHAPTER V

CONCLUSION & SUGGESTION

5.1 Conclusion

It is safe to say that along with flour and kernels, Frog meat Powdered Stock is also made with Egg shell powder; a good source of calcium and protein. The calorie dense product realized as a 'biscuit' is produced with the help of low temperature, long time baking process and thus retains quite good and fresh tastes and available for everyday use. This study describes a new ID, which is rich in calories, flavors and nutrient, and has been praised for its nice taste, finely powdered texture and possible uses in dishes. The retail price of this product is Rp 6.500,- per pack with 35 calories in each pack.

5.2 Suggestion

For the continued success of your frog meat powdered stock with eggshell powder, consider focusing on sustainable sourcing of frog meat to appeal to environmentally conscious consumers. Additionally, rigorous testing on shelf life and nutrient retention will help ensure the product's quality over time and provide clear storage guidelines to maximize freshness. Expanding the product's versatility by developing recipes or usage ideas could also attract a broader customer base. Lastly, consider marketing the product's dual appeal—its culinary uniqueness and health benefits, especially targeting demographics interested in gourmet cooking and nutritional supplementation.
