

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

In conclusion, this chicken breast chips is developed for people that wants to get protein and healthy snack because it has protein, healthy and low calorie. This product is made from chicken breast that high in protein. From the sensory test that involves 10 panelists, sight and smell is good. The taste was less seasoning and the texture is bit grainy. This recipe will produce 1 pack of chicken chips with the net weight.

5.2 Suggestion

The recipe of this product can be further developed such as flavor variants, to achieve the best results in terms of taste and aroma. In addition, the best initial process needs to be done further to get a better and more delicious texture. The taste of the chips can be further balanced by reducing the salt content because sodium content Was quite high.
