

CHAPTER V

CONCLUSION

5.1 Conclusion

The demand for healthy food products in the local food industry is very high. This makes the local food industry must continue to improve, innovate, and do good research to develop products. Our company seized this opportunity by introducing Creackers Cucumber Skin.

Just because few people know how to properly manage cucumber skin. In the skin of cucumber itself contains many vitamins and minerals and can be healthy for consumption. We make cucumber skin into a 100% natural cracker so our products are safe for everyone to eat.

We believe this product can compete with other similar products on the market. Overall our products still need to be improved in many ways to improve the taste and quality of our products.

5.2 Suggestion

I know the product I created is not perfect, in the future I will fix any deficiencies in my product by receiving all positive inputs for the production of "crackers cucumber skin".
