

## **CHAPTER V**

### **CONCLUSION**

#### **5.1 Conclusion**

As time goes by, the demand for healthy food product increased but the competition in food industry never ends. The solution remains to create new alternative for society to choose, but of course with good taste and good product quality.

Avocado seed has become waste because people didn't know the nutrition behind that seed. The waste is higher from year to year. Making this seed into powder, in this case The Super Powder, is one way to lessen the amount of avocado seed wasted and also this powder became people more healthy.

#### **5.2 Suggestion**

In the future, the writer believes that further research and development are needed to make the product even better in taste and appearances. Deeper market studies also required to develop this new invention so it could be sold in the society.
