

## **CHAPTER VI**

### **CONCLUSION**

#### **6.1 CONCLUSION**

In a conclusion, with how good benefit health that chickpea give. Chickpea is making a new alternative innovation for tempe industry. Chickpea tempe can be alternative tempe for who is allergic to soy bean, because Chickpea tempe have similar texture and taste to Soy bean tempe. So with our product we want everyone can enjoy this traditional food with affordable price.

#### **6.2 SUGGESTION**

Duelling Chickpea skin can be challenging, so I suggest after soak in water for 14 - 24hr you need soak in hot water for another 30 minute than you can duelling skin with hand more easily. When you want to make tempe, you need to make sure that your bean doesn't have any residual water, because when your bean have to much water the mold doesn't want to grow, it's same. Use a little vinegar because vinegar can stopping the development of bad mold or bacteria.
