

# CHAPTER I

## INTRODUCTION

### 1.1 Background of Study

The internship program is not only for building skills, but also to build a good connection which is used for their professional networks in the future. With an internship program, hopefully we can pass the qualification to work in a professional work place. The internship period usually ranges from 3 months to 12 months. Usually companies provide salaries for transportation as well as food allowance. And generally the working time ranges from 8-10 hours per day.

It is a pleasure to be a part of their team and learn so many new techniques and product knowledge. The writer personally feel this internship program give the writer some positive impacts not only in skills but also to build good relationship with the employees. We are not just academically applying the theory that we get from Akademi Kuliner dan Patiseri OTTIMMO Internasional but, we also learn about discipline and responsibility in real work life.

The author chose an Intership at Mier Dessert and pattiserie because the author chose a place that only focused on the field of dessert and patisserie, just want to learn about that, and after trying the cake from the cake in Mier, it showed that the cake made in that place has the attraction to learn from the decoration and taste of the cake that is produced is encouraging to choose Mier as a place for her internship program place to learn how to make cake that had never been obtained while in OTTIMMO International.
