

EXECUTIVE SUMMARY

As time goes by, there are so many varieties flavors of foods. There are sweet, bitter, sour, and spicy. Some are good for human body and some are not. For children, good food is not necessarily healthy. The most fatal thing is to disrupt their growth. And especially in their teeth, because the disruption of tooth function causes them not to smoothly devouring nutrient intake which has bad impact such as slower their growth.

By looking at this opportunity, the author took the initiative to make candy that have many benefits. Because in general children are prohibited from consuming candy because it will cause toothache. However, the author have a new innovation by replacing sugar with honey in the contents of our candy snack products” Watermelon Skin Candy” and there is Watermelon skin taste that will help smooth the digestion of children. And for woman skin.
