

# **BAB I**

## **INTRODUCTION**

### **1.1 Background of Study**

Internship is where student works in an organization to gain work experience and to know real life work. This internship not only to build our skill but to gain confident to talk with others, teamwork, and knowledge improve. In that case, you can improve your social skills, such as how to be polite, how to talk to people and more important, build a networks for our future need.

I choose Vasa Hotel because it's near and it's a five star hotel known as good quality and services. I used to stay at Vasa Hotel and I love the food and service. They have a high standard and comfortable hall like their breakfast hall, it's satisfying and clean.

Vasa Hotel Surabaya have four department such as Xiangfuhai (Chinese Cuisine), 209 Kithcen (bfast and small events), Pastry and Main kitchen (banquet). It's a good opportunity for me to placed at 209 kithchen because there are many things to learn such as in cold kitchen I learned about vegies, how to cut a fruit fastest way, how to keep the vegies in a good condition. There's also western kitchen that taught me how to make pasta sauce, how to roast a beef, what temperature is good for steak and how to store their belongings so that it doesn't ruined.

I hope from this internship experience, I could prepare myself or a real life work and be able to gain more experiences, knowledge, and becoming one of the greatest chef.
