RECIPE BACKGROUND (50 – 100 WORDS)

Jackfruit rags especially in ripe ones are usually considered a food waste, but in contrary, jackfruit rags actually contains a good amount of protein and fibre. Also, rendang is one of Indonesia cuisine that is not considered very healthy because the usage of coconut milk which contains a high amount of cholesterol and the time consuming process made it not very desirable to make. So by changing meat to jackfruit rags and coconut milk to soy milk, we can make it vegan friendly and reduce the amount of calorie and LDL.
