APPENDIX RECIPE

Recipe Name : UBE TAPE CAKE
Yield : 5-6 portion
Main Ingredients : PURPLE SWEET POTATO / UBE
Ingredients :

UBE TAPE

- 500 gr ube
- 2 pieces tape yeast

Method :

1. First, prepare a tightly closed container. Can be covered with banana leaves, may not.
2. Then, choose ube with the best quality..
3. Peel the ube and cut about 5-10 cm long. Wash thoroughly with running water.
4. Next, steam the ube until cooked for about 20 minutes. Check for doneness by pricking it with a fork. If the fork comes out easily, it means the ube is ripe. If it is ripe, drain the ube.
5. Puree the tape yeast. Store in plastic, then grind using the back of a spoon until smooth.
6. Prepare a container, sprinkle the base using yeast tape by sifting. Arrange the ube in the container, then sprinkle again with yeast tape. Do it until it runs out and evenly.
7. Close the container tightly. Store in a warm place. Leave it for 2-3 days. This is the fermentation process. Do not open the jar before 3 days.
8. After 2-3 days, you can check whether the tape is ready or not. Adjust to taste, yes. The longer the fermentation, the more acidic the tape will be.
9. If you want something sweet, open the container when it's been 2 days. The result is not too mushy / runny, but still legit.
10. Next, after the ube tape has reached the desired maturity, store it in the refrigerator (chiller section) and the container is tightly closed.

UBE TAPE CAKE

- 500 gr of ube
- 360 gr of medium protein flour
- 240 gr sugar
- 80 gr thick sweet vanilla
- 300 gr of butter
- 10 eggs
- 2 tsp emulsifier
- grated cheese

Method:

1. prepare the necessary materials
2. Mix some ingredients until fluffy
3. Add the ube tape to the container. After that, add the sweetened condensed to it, then mix with a mixer on low speed. Add the flour little by little, stirring with a spatula until smooth.
4. Pour melted butter into the mixture, then mix until smooth. Prepare a baking sheet, then grease it first with margarine and flour so that the dough doesn't stick. Add the sponge mixture to it. Give grated cheese according to taste on it.
5. Bake for about 30 minutes at 170 degrees Celsius until cooked. If you want to make sure it's cooked or not, pierce it with a fork. If you have, the cassava tape sponge is ready to be served!

RECIPE BACKGROUND (50 – 100 WORDS)

Tape is usually made with cassava and yellow in color. Using ube which is one of Indonesia's local produce, i want to make tape more interesting since ube is naturally purple in color. Ube has a lot of beneficial nutrients that are good for our body. With ube tape, we can use it as we usually use tape, like in drinks or food. In this case, i want to use ube tape as one of my main ingredients in making cake. Using ube tape in cakes, will give it slightly acidic taste and balance which is new and innovative.
