

## **CHAPTER IV**

### **CONCLUSION AND SUGGESTION**

#### **4.1 Issues Encountered and the Solution**

During internship, there's several issues that occurs frequently. First, lacks of some cooperative work from certain people (solution: let them work in other department). Second, missing items and equipment during work (solution: keep items in locker). Third, mental pressure which is very common to occurs even in some certain workplace (solution: keep calm & under control). Fourth, lacks of concentration (solution: keep hydrated). Fifth, running out ingredients (solution: restrain order).

#### **4.2 Benefits of Internship in Students Point of Views**

The benefits of having an internship in my point of views are we learn a lots of different things from different persons by knowledge sharing, supportive assists, and creating mutual relation between each other. At the same time, internship also helps me open the first gate for the recruitment into entering the actual workplace through the trials of training the skills, mental & behavior.

#### **4.3 Suggestion**

In my suggestion for the Academy, it should give more practical class especially for the students who will continue to work in the kitchen environment. With an aim to get the students more used and able to handle in the certain situation inside the actual work environment.

In my suggestion for the future students, you should be prepared for everything since some of them are rather to focusing to teaching the operation and procedure than making the items, resulting in a different expectation. On the other hand, attitude sometimes also plays a role for them to see if you are capable of using your professional behavior when overcoming the situation.

In my suggestion for the company, they should review their employee at the best to prevent the harassment and unfair recruitment. In the meantime, it will help the company to create a well-managed work environment.

#### **4.4 General Point of Views**

In general, we should know how to choose the good environment for work. At the same time if we already chose the work environment whether is good or bad, we have to get used with the situation inside the kitchen and able to make it conducive.

#### **4.5 Memorable Moments**

The most memorable moments during internship are able to understand the certain procedure and the operation of the workplace itself. On the other hand, it also creates a mutual relationship among different peoples through background, experiences, and personality. In the end, it will create a personal benefit toward ourselves.
