

## **CHAPTER IV**

### **CONCLUSION**

#### **4.1 Problem and Solution**

Difficult in adapting to the environment: While author was at 07:AM Bakers, the first problem Author experienced was having some difficulties in adapting because the work life and the college life were quite different. During college, Author studied some techniques and the lecturers there guided us patiently to make a product. While on the work field, Author must take more initiative in working as a team. My solution is try to work faster and take more initiative while working.

#### **4.2 Benefit of The Internship**

- Get to know more new people and also the different perspectives of people.
- Get to know more about Balinese culture because the majority here is Balinese.
- Get to know more about the basic of work, especially in the pastry section.
- Become more disciplined.

#### **4.3 Opinion**

Author highly recommend Ottimmo for students who want to do an internship at 07:AM Bakers because all the staff are very friendly and author treat each other like family. The head chef is also very helpful, especially Mbok Na and Mbok Ri who keep guiding the trainees in their internship. And if there are only a few interns at 07:AM Bakers, we can stay in one division for 6 months or we can also ask to change to another division according to our wishes.

## **4.4 Suggestion**

### **4.4.1 For 7:AM Bakers**

- Add more utensils, such as spoon, spatula, bowl, storage box.
- The bowls in the pastry and viennoseries sections should be added more.
- Add more air conditioners in the hot kitchen section and also in the bar section because the temperature's quite hot.
- Relocate the bread cutter because it could disturb the customer by the noisy sound.

### **4.4.2 For Ottimmo International**

- Add another lecturer in the pastry and bakery section. Lecturers who take the initiative in guiding their students and not running away from their duties in teaching. For example, at the beginning of the lecture, the lecturer explains the steps in sequence and then in the middle of making the product, the lecturer just disappeared suddenly without any reasons so the author had to ask another lecturer.
