

CHAPTER V

CONSLUSIONS AND SUGGESTIONS

5.1 General Summary of The End Product

The general summary of the end product are :

1. Durian seeds, as a wasted product of durian, can be processed into durian flour.
2. Durian flour mixed with other ingredients of Surabi can be processed into Suradian.
3. Suradian has been accepted as an improvement pancake with good quality and can be delivered to customers with convenient packaging to give the best safety and healthy.
4. The product selling price for a piece of suradian, based on product cost per piece of suradian Rp. 13.200,- and the margin 25 percent, is Rp. 15.500,- (fifteen thousand five hundred rupiah).
5. Recipe of suradian has been approved by the panelist. Suradian has been approved by panelists with criteria of sight, smell, texture and taste.

5.1 Suggestion and Future Development

Suradian can be developed in the following project research by using quality raw materials and prioritizing innovation and delicious new products.

5.2 Benefit of Study

The benefit of Suradian's study is developing unique and quality products, such as durian flour from durian seeds. Because durian seed is a waste product of durian that can be reprocessed into a fantastic product.
