## CHAPTER 5 CONSLUSIONS AND SUGGESTIONS

### 5.1.GENERAL SUMMARY OF THE END PRODUCT

Making persimmon as a cuisine that many people may enjoy is made possible by the innovation of persimmon mousse. Although it has numerous health benefits, the persimmon fruit has a astringent flavour that makes it a fruit that few people enjoy. For this reason, I created innovations from persimmons so that everyone is aware of the advantages of persimmons, especially their health advantages. The ingredients for making persimmon mousse are fairly easy to get, it's just that persimmons have a growing season.

Persimmon fruit has a dense texture, sweet and slightly astringent from there I was inspired to make persimmon mousse so that persimmon fruit is delicious and easy to consume, persimmon mousse can be consumed by all ages because it has a good taste and benefits for body health

The persimmon mousse that I made is a low-calorie, healthy persimmon because I want to let people know that even low-calorie foods taste delicious and are delicious to eat.

In order to attract many buyers, I designed the product packaging as attractive as possible, for example by making an attractive logo on the product, with prices starting from IDR 80,000 buyers can enjoy delicious and healthy mousse. I want to give the best for my buyers so that my buyers are satisfied with the products I sell.

### 5.2.SUGGESTION AND FUTURE DEVELOPMENT

For the future I will always try to develop the best products and maintain the quality if raw materials and also prioritize innovation and also delicious new products.

### 5.3.BENEFIT OF STUDY

It's also crucial to create original, high-quality products like persimmon mousse. Persimmon mousse is simple to create and has ingredients that are readily available. It is for this reason that I create this special product, which will serve as justification for always using uncommon resources to be processed into something special.
